

## About Me

I am a hardworking, motivated fourth-year Information Technology student at the Royal University of Phnom Penh (RUPP) with a strong passion for learning and personal growth. I enjoy taking on new challenges and continuously improving my learning ability. I am a quick learner, adaptable to new environments, and able to work effectively both independently and as part of a team. I am responsible, eager to gain practical experience, and committed to growing professionally.

- Chinese - Pre-Intermediate

# EAM PUTVICHEKA

*Full-Stack Developer ( Front-End & Back-End )*

## Education

**2017-2023**

**High school**

BELTEI International School

**2022-2025**

**Australian Center for Education**

Successfully completed an English program and the IELTS test

**2023 - Present**

**Royal University of Phnom Penh (RUPP)**

Department of Institute Technology Engineering

## Projects Development

**2026 - June 22**

### Cartlix

**E-Commerce Web Application**

Full-stack online shopping platform built with **React.js**, **Laravel**, **PHP**, and **MySQL/Supabase**. Customers can browse products, manage a cart, view order summaries and history, and check out with Bakong QR code payment integration. Includes a secure admin dashboard (JWT authentication) for managing customer orders and full CRUD operations on products. Frontend and backend deployed independently on Google Cloud Run.

**2026 - June 18**

### EduManage System

**Full-Stack Developer**

Built with **ReactJS**, **Laravel**, **PHP**, **PostgreSQL** (Supabase), with role-based access control (student/teacher/admin/staff). Includes dashboard, course management, student records, attendance tracking, reports, and assignment scores, with fully responsive front-end pages.

**2025 - Nov 18**

### Libraries System

**Full-Stack Developer**

Built with **React**, **Laravel**, **PHP**, and **MySQL**, with role-based access control (Spatie). Includes book catalog management (CRUD, PDF upload/reading, popularity tracking), a borrower request workflow with email-based confirm/reject, and borrow-transaction tracking with pickup logging.

**2024 April, 21 - 2024 Oct, 20**

### ETEC CENTER

**Participant**

Completed a short course and got a certificate of completion in Front-End Development, graded on attendance and a final project. Independently built a personal front-end project , an anime themed website, as the final project, and separately cloned the front-end of the Sabay News website as a practice exercise, replicating the design and layout exactly.

**2025 Jan, 1 - 2025 Sep, 26**

### E-Coding Course

**Participant**

Completed online training covering **PHP** and **Laravel**. Studied **PHP** fundamentals and built several small websites with full CRUD functionality. Went on to learn **Laravel**, implementing CRUD operations along with authentication using **JWT** and other methods.
